

## Our Unique Approach:

While our learning sessions are an integral part of our plan, it is The Education Station's unique approach to engaging each child that makes our center a success. We have combined an active piece to our approach so that students are given the breaks they need to readjust, focus, and prepare for their time with our teachers. Our **90 minute** model allows for students to work under a structured domain as well as be part of an active and social environment.

**Step One- Classroom Station:** We use a combination of skill assessments, observations with a current or former teacher, and a survey to become acquainted with your child. After a complete assessment of your child's academic strengths and weaknesses, as well as getting to know his or her attitudes about school and learning, students will engage in a 30 minute learning session.

**Step Two- Choice Station:** Students are allowed a 15 minute choice time which includes (but not limited to) the Technology Station, Building Station, and Puzzle Station. This allows your child to take a "brain break" and make his or her own choice to being part of a social environment while having a hands on learning experience.

**Step Three- Work Station:** A 30 minute work time is allotted for your child to participate in. A well trained aide and teacher will be available to work with your child on any academic need within their own classroom. Flash cards, literacy units, and grade level material will be available. However, your child is welcomed to bring in classroom work that needs support.

**Step Four-Active Station:** The active station allows children to burn off some energy and engage in social interaction with their peers. The Active Station will end their last 15 minutes at The Education Station.

Located in the *Tauber Law Offices* behind *Red Robin* on Indianapolis Blvd.

The Education Station is a unique learning center designed to meet your child's individual needs for remediation or enrichment.

### CLASSROOM STATION

After a complete assessment of your child's academic strengths and weaknesses, your child will engage in a 30 minute learning session to support or enrich a subject area.

### CHOICE STATION

Students are allowed a 15 minute choice time which includes (but not limited to) a Technology Station, Building Station, and Puzzle Station.

### WORK STATION

A 30 minute work time is allotted for your child. A well trained aide and teacher will be available to work with your child on any academic need they have within their own classroom.

### ACTIVE STATION

The active station allows children to burn off some energy and engage in social interaction. The active station will end their last 15 minutes of their learning session.

The Education Station provides academic support and enrichment to all students in grades K-6. Our primary goal is to create an open atmosphere of learning for our students.

We at The Education Station determine your child's exact academic needs and attitudes towards learning through our innovative products and assessment process. This allows us to gain insight and gather information to create a personal learning plan for your child.

## Each Education Station Assessment Includes:

Our computer-adaptive skills assessment allowing us to gather information on your child's strengths and needs

Observations from current and former teachers, identifying your child's abilities in Language Arts and Math

A self-evaluation which your child completes, reflecting his or her own conventions and attitudes towards school which will allow us to support individual needs
