EARLY CHILDHOOD PROGRAM

The early childhood classrooms provide a developmentally appropriate, structured classroom experience for children with disabilities and community preschoolers.

The classrooms meet individual needs through curriculums that foster the development of the whole child: intellectually, physically, socially, and emotionally.

- *A low staff to student ratio, allowing individualized attention to each child’s needs.*
- *Creative curriculum is a curriculum based on the needs, abilities, and interests of children.*
- *A daily routine providing structure and security which includes activities to promote fine and gross motor, concepts, language and social/emotional development.*
- *Children attend either a morning or afternoon class.*
- *Children eligible for special education services have an individualized education program (IEP) based on their strengths and needs.*

PEER MODELING

Community preschoolers are invited to register by calling 365-8507 for more information. Children learn from each other as well as from adults. The early childhood program promotes a multi-ability environment. We believe it is important that the classroom reflect a wide range of skills and abilities.

Tuition for Community Preschoolers

- 2 days per week- \$100 a month
- 3 days per week- \$135 a month
- 4 days per week- \$150 a month

Services for children with individualized education programs (IEP) will be recommended by the child’s case conference committee, following an assessment.
